CONTENTS

Number 1

J. BOUMA. Using soil survey information to cha:acterize the soil-water state 1

RACHHPAL-SINGH & P. H. NYE. A model of ammonia volatilization from applied urea. I. Development of the model 9

RACHHPAL-SINGH & P. H. NYE. A model of ammonia volatilization from applied urea. II. Experimental testing 21

RACHHPAL-SINGH & P. H. NYE. A model of ammonia volatilization from applied urea. III. Sensitivity analysis, mechanisms, and applications 31

P. R. DARRAH, R. E. WHITE & P. H. NYE. Simultaneous nitrification and diffusion in soil. II. The effects at levels of ammonium chloride which inhibit nitrification 41

P. R. DARRAH, P. H. NYE & R. E. WHITE. Simultaneous nitrification and diffusion in soil. III. The effects of the addition of ammonium sulphate 53

G. M. EGGINTON & K. A. SMITH. Nitrous oxide emission from a grassland soil fertilized with slurry and calcium nitrate 59

G. M. EGGINTON & K. A. SMITH. Losses of nitrogen by denitrification from a grassland soil fertilized with cattle slurry and calcium nitrate 69

N. A. POLYZOPOULOS, V. Z. KERAMIDAS & A. PAVLATOU. On the limitations of the simplified Elovich equation in describing the kinetics of phosphate sorption and release from soils 81

J. K. A. KETER & P. M. AHN. Profile characteristics, and form and surface activity of inorganic phosphorus in a deep red Kenya coffee soil (Nitosol) 89

H. P. ROTHBAUM, R. L. GOGUEL, A. E. JOHNSTON & G. E. G. MATTINGLY. Cadmium accumulation in soils from long-continued applications of superphosphate 99

C. G. TRAPNELL, R. WEBSTER & P. R. HESSE. Microaggregates in red earths and related soils in East and Central Africa, their classification and occurrence 109

B. T. CHRISTENSEN. Straw incorporation and soil organic matter in macro-aggregates and particle size separates 125

J. T. DOUGLAS, M. G. JARVIS, K. R. HOWSE & M. J. GOSS. Structure of a silty soil in relation to management 137

D. J. CAMPBELL & R. HUNTER. Drop-cone penetration *in situ* and on minimally disturbed soil cores 153

D. SCHOLEFIELD & D. M. HALL. A recording penetrometer to measure the strength of sole in relation to the stresses exerted by a walking cow 165

Number 2

A. J. Koppi & H. R. Geering. The preparation of unsmeared soil surfaces and an improved apparatus for infiltration measurements 177

D. A. Ratkowsky. A. statistical study of seven curves for describing the sorption of phosphate by soil 183

P. H. Nye & Ameloko. A comparison of measured and theoretical soil acidity diffusion coefficients over a wide range of pH 191

H. M. Sibanda & S. D. Young. Competitive adsorption of humus acids and phosphate on geothite, gibbsite and two tropical soils 197

G. S. P. Ritchie & S. C. Jarvis. Effects of inorganic speciation on the interpretation of copper adsorption by soils 205

S. C. Jarvis. Forms of aluminium in some acid permanent grassland soils 211

R. G. McLaren, D. M. Lawson & R. S. Swift. The forms of cobalt in some Scottish soils as determined by extraction and isotopic exchange 223

R. M. C. Muchovej, A. C. Borges, R. F. Novais & J. T. L. Thiebaut. Effect of liming levels and Ca : mg ratios on yield, nitrogen content and nodulation of soyabeans grown in acid Cerrado soil 235

B. T. Christensen & L. H. Sørensen. Nitrogen in particle size fractions of soils incubated for five years with ^{15}N-ammonium and ^{14}C-hemicellulose 241

R. S. Sheil. Variation in amounts of carbon and nitrogen associated with particle size fractions of soils from the Palace Leas meadow hay plots 249

Z. Karim & A. C. D. Newman. The possible effect of soluble silicon on the lepidocrocite content of gley soils from England and Bangladesh 259

N. J. Barrow. Testing a mechanistic model. I. The effects of time and temperature on the reaction of fluoride and molybdate with a soil 267

N. J. Barrow. Testing a mechanistic model. II. The effects of time and temperature on the reaction of zinc with a soil. 277

N. J. Barrow & A. S. Ellis. Testing a mechanistic model. III. The effects of pH on fluoride retention by a soil 287

N. J. Barrow. Testing a mechanistic model. IV. Describing the effects of pH on zinc retention by soils 295

N. J. Barrow & A. S. Ellis. Testing a mechanistic model. V. The points of zero salt effect for phosphate retention, for zinc retention and for acid/alkali titration of a soil 303

N. J. Barrow. Testing a mechanistic model. VI. Molecular modelling of the effects of pH on phosphate and on zinc retention by soils 311

D. L. Rimmer & A. Gildon. Reclamation of colliery spoil: the effect of amendments and grass species on grass yield and soil development 319

K. Chaney & R. S. Swift. Studies on aggregate stability. I. Re-formation of soil aggregates 329

K. Chaney & R. S. Swift. Studies on aggregate stability. II. The effect of humic substances on the stability of re-formed soil aggregates 337

H. A. Elwell. Determination of erodibility of a subtropical clay soil: a laboratory rainfall simulator experiment 345

Books on Soil Science Recently Received 351

Number 3

H. B. Madsen, C. R. Jensen & T. Boysen. A comparison of the thermocouple psychrometer and the pressure plate methods for determination of soil water characteristic curves 357

G. D. Towner. Anisotropic shrinkage of clay cores, and the interpretation of field observations of vertical soil movement 363

S. Staunton. The self-diffusion of sodium in soil: factors affecting the surface mobility 373

N. S. Bolan, J. K. Syers & R. W. Tillman. Ionic strength effects on surface charge and adsorption of phosphate and sulphate by soils 379

P. B. S. Hart, J. H. Rayner & D. S. Jenkinson. Influence of pool substitution on the interpretation of fertilizer experiments with ^{15}N 389

M. S. Brar & G. S. Sekhon. Desorption of potassium from five soils of North India using electro-ultrafiltration 405

R. G. McLaren, D. M. Lawson & R. S. Swift. Sorption and desorption of cobalt by soils and soil components 413

I. D. Pulford. Mechanisms controlling zinc solubility in soils 427

I. P. Little. Mobile iron, aluminium and carbon in sandy coastal podzols of Fraser Island, Australia: a quantitative analysis 439

R. Ponce-Hernandez, F. H. C. Marriott & P. H. T. Beckett. An improved method for reconstructing a soil profile from analyses of a small number of samples 455

P. R. Darrah, R. E. White & P. H. Nye. Simultaneous nitrification and diffusion in soil. IV. Simplification and sensitivity analysis of the simulation model for ammonium chloride 469

P. R. Darrah, P. H. Nye & R. E. White. Simultaneous nitrification and diffusion in soil. V. The effects of pH change, following the addition of ammonium sulphate, on the activity of nitrifiers 479

J. A. King, K. A. Smith & D. G. Pyatt. Water and oxygen regimes under conifer plantations and native vegetation on upland peaty gley soil and deep peat soils 485

Errata 498

Number 4

V. Barron & J. Torrent. Use of the Kubelka–Munk theory to study the influence of iron oxides on soil colour 499

G. J. D. Kirk & P. H. Nye. The dissolution and dispersion of dicalcium phosphate dihydrate in soils. III. A predictive model for regularly distributed particles 511

G. J. D. Kirk & P. H. Nye. The dissolution and dispersion of dicalcium phosphate dihydrate in soils. IV. Experimental evaluation of the model for particles 525

G. J. D. Kirk & P. H. Nye. A simple model for predicting the rates of dissolution of sparingly soluble calcium phosphates in soil. I. The basic model 529

G. J. D. Kirk & P. H. Nye. A simple model for predicting the rates of dissolution of sparingly soluble calcium phosphates in soil. II. Applications of the model 541

K. W. T. Goulding & P. J. Loveland. The classification and mapping of potassium reserves in soils of England and Wales 555

M. V. Cheshire & C. M. Mundie. The fractionation of soil polysaccharide by electrofocusing 567

J. E. Gregor & H. K. J. Powell. Acid pyrophosphate extraction of soil fulvic acids 577

P. B. Tinker. Trace elements in arable agriculture *Hills Bequest Lecture of the Royal Agricultural Society of England, 9 October 1985* 587

M. Jahiruddin, B. J. Chambers, N. T. Livesey & M. S. Cresser. Effect of liming on extractable Zn, Cu, Fe and Mn in selected Scottish soils 603

A. B. McBratney & R. Webster. Choosing functions for semi-variograms of soil properties and fitting them to sampling estimates 617

A. C. Armstrong. On the fractal dimensions of some transient soil properties 641

G. J. T. Scott, R. Webster & S. Nortcliff. An analysis of crack pattern in clay soil: its density and orientation 653

J. T. Douglas. Effects of season and management on the vane shear strength of a clay top soil 669

R. Tippkötter, K. Ritz & J. F. Darbyshire. The preparation of soil thin sections for biological studies 681

C. E. Mullins, O. T. Mandiringana, T. R. Nisbet & M. N. Aitken. The design, limitations, and use of a portable tensiometer 691

Books on Soil Science Recently Received 701
